

Ruiya Joins the CPM Extrusion Group

CPM is pleased to announce the acquisition of Ruiya Polymer Processing Co., Ltd. of Nanjing, China. With the addition of Ruiya, CPM will expand its powerful global manufacturing and service network as it continues to offer customers the finest engineered, manufactured, and supported extrusion technologies.

**The Global Leader in
Primary Processing Equipment**

**CENTURY
EXTRUSION**
Your Partner in Productivity

Century Extrusion is a global leader in the supply of twin screw extruders, replacement parts, and support services for many industries, including plastics compounding, masterbatch, powder coatings, human food, pet food, and many others. Century Extrusion strives to deliver unsurpassed value in its CX line of twin screw extruders and extrusion systems by focusing on total cost of ownership, maximum reliability, and after market service.

For many years, Century Extrusion has held the market leadership position in North America for twin screw extruder replacement parts. With a rigorous attention to quality and detail, they provide precise dimensional tolerances and world class fit and finish. Century Extrusion maintains their signature quality through the continued development of advanced materials of construction, a broad product line, and an intense focus on responsive customer service.

Ruiya Extrusion Joins the CPM Extrusion Group

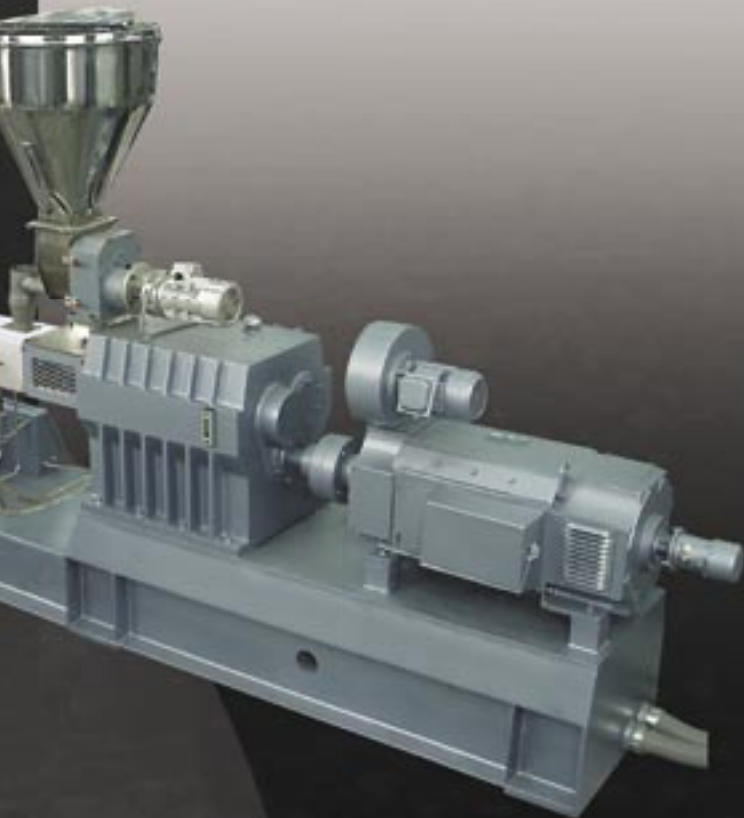

**RUIYA
EXTRUSION**

Your Partner in Productivity

Ruiya Extrusion is a leading provider of twin screw extruders and ancillary equipment to the plastics and primary processing industries in Asia, and has worked in partnership with Century Extrusion since 2004.

Ruiya focuses on the development and production of polymer compounding and modification equipment and related process equipment and engineering services. Ruiya's product line extends from feeders to pelletizers, and includes turn-key projects.

Ruiya has sold over 1500 twin screw extruders worldwide and boasts the second largest market share of twin screw equipment in China. The management and technical team has been developing and supplying compounding solutions for over two decades. With its strong manufacturing, rapid engineering, and innovative, flexible designs, Ruiya delivers outstanding value, service, and process support.

About CPM

Established in 1883, CPM is the world's leading supplier of process equipment and technology for the animal feed, oilseed, biofuels, compounding, and human food processing industries. CPM's pelleting, extraction, grinding, flaking, extrusion, thermal processing, scaling, and automation equipment excel in the most demanding applications. CPM's holdings include California Pellet Mill, Roskamp Champion, Beta Raven, Wolverine Proctor, Century Extrusion, Ruiya Extrusion, Crown Friendship, and Crown Iron Works. CPM has more than 950 employees with production facilities in the Americas, Europe, and Asia. For more information visit www.cpmroskamp.com.
